

Your awesome GAUK idea

Current State Of Knowledge

Describe why others are doing it wrong. [2]

Material Resources For The Project

Show off all 9 GPUs from the gpulab cluster together with all the blade servers from parlab (or any other infrastructure your group has access to).

Project Objectives

Describe how you can do it better [1].

Methods Of Project Implementation

Describe your awesome method that will beat everybody up [2].

Timeline

Describe how you are going to make it on schedule (not the night before the deadline as always!).

Risk Identification

Nothing can stop you. Just make something up so the GAUK people are happy.

Description Of The Research Team

Describe who is also going to be famous because of your brilliant ideas.

Expected Project Outcomes And Their Dissemination

Describe how your research is going to save the world and why everybody should care.
